THE following list of supplies is offered to our customers and the milling public with the assurance that every article will be found unexceptionable in quality, convenience, efficiency, and accuracy, and for the uses designed will prove the most economical purchase now offered.

Reference is directed to our illustrated book of over one hundred pages for more full description.

Prices subject to change with cost of material, without notice.

COPYRIGHT SECURED.

Entered according to Act of Congress, in the year 1875,
by NORDYKE, MARMON & Co., in the Office of the
Librarian of Congress, at Washington.

FRENCH BUHR MILL-STONES.

STOCK OF WHICH THEY ARE MADE IMPORTED AND SELECTED
BY OURSELVES.

DIAMETER OF STONE-	NEW QUARRY.		OLD QUARRY.	
	Faced.	Faced and Furrowed.	Faced.	Faced and Furrowed.
30 inch.	\$75	\$95	\$95	\$115

" 14, "	4 20
" 15, "	4 70
" 16, "	5 25

BOLTING-CLOTH MAGNIFYING GLASSES, \$1 each.

WE DO NOT KEEP the Plain or Standard Cloths of Nos. 8, 9, 10, and 11—only the heavy grades.

MAKING UP CLOTHS with strips of heavy ticking, sewed in to come in contact with ribs of reel, ready to put on (the correct dimensions having been given), 50 cents per foot in length. When made up without strips we charge 40 cents per foot. No charge is made for the space occupied by the strips of ticking, but only for the actual silk cloth used. Thus a cloth made up in strips is not only cheaper, but the best to the consumer.

THIS REFERS TO REELS with six ribs. For eight-rib reels we charge 65 cents per foot length of reel. All intermediate seams are first sewed, then covered on both sides with tape and double-seamed again.

DO NOT NEGLECT to give us the amount of each number of cloth wanted or your ideas about it; if not, give us the capacity you want the reel to work up to, size and quality of stones, and whether your flour is to be for home or merchant market, or both.

Under the new postal regulations small packages (say from two to ten yards or more) can be sent by mail and save express charges, if the price is sent with order.

GRAIN-CLEANING MACHINERY.

KIND OF MACHINE.	Size of Machine.	Weight in lbs.	Without Shoe.	With Shoe.
Eureka, or Silver Creek Smut Machine . . .	No. 0	500	\$115	\$125

RUBBER BELTING.

With Smooth Metallic Rubber Surface.

This is made of Cotton Duck weighing 2 lbs. per yard, woven expressly for the purpose, and is vulcanized between layers of a patent metallic alloy, by which process the stretch is entirely taken out, the surface is made perfectly smooth, and the substance is thoroughly and evenly vulcanized.

See description-book of Richmond Mill Works for data concerning Water-powers, Plans, and Attachments.

We are prepared to furnish all other first-class Wheels, and allow our customers to select.

DESCRIPTIVE BOOK of over 100 pages, with Engravings and Plans, size 8vo, sent, postage prepaid, for 35c.

MILL GEARING.

Neatness of Design,

Excellence of Proportion,

Strength without Waste.

IN ORDERING to fit a certain shaft, send a stiff wire, pointed at the ends, indicating the exact diameter.

DIAMETERS of all the wheels given here are measured at pitch-lines, and given in inches and hundredths.

BEVEL GEAR work together in pairs, as indicated by braces in the margin, thus: {

MILLWRIGHTS, MILL-OWNERS, AND OTHERS

intending to build mills of any kind, will find it profitable to carefully examine our list.

Having a large force of pattern-makers constantly at work on new gearing, parties will remember, should they not find here what they want, that we can supply it from those made since the issue of this list; or, if an exceptional case, will procure it or make the pattern of the size and proportion required.

We have various styles of Couplings, Gudgeons, Pillow-blocks, Hangers, etc.

PULLEYS (*see list on pages 22, 23, and 30*).—Of late years we have produced a stock of desirable Gearing, which has no superior, and is adapted to the special needs of flour-mills.

OUR GEAR-CUTTING ENGINE, for Bevel and Spur Wheels of any size or face, is not surpassed by any for accuracy and efficiency.
